MEASURING FOR BELTS

Method 1. Use your old belt

1. Using your old belt, measure the distance from the buckle tongue or hook to the most used hole. Record this distance as **WAIST MEASUREMENT** on the form.

Method 2. Measure the waist

1. Measure the waist over clothing where the belt will be worn. Record this as **WAIST MEASUREMENT** on the form. **DO NOT USE THE TROUSER OR JEANS WAIST SIZE.** For ladies belts, record a high waist and low waist measurement if your jeans and slacks are worn high and low on your hips.

All belt orders:

2. If I do not have the buckle for your new belt, measure the length of the buckle and record both the **BUCKLE LENGTH** and **BUCKLE WIDTH** for the new belt on the form. All belts are made with buckles mounted on the left-hand side when worn, unless right hand mounting is requested or required by buckle design. Buckle sets need to be sent with your order so that tips can be mounted and the belt is made for the number of keepers with the set.
3. Complete the remainder of the form.

****TAKE ACCURATE MEASUREMENTS *** ALL BELT SALES ARE FINAL****
